

#### Attachment #6

The purpose of this study was to assess the acute oral toxicity of the PMN substance. An acute oral gavage study was conducted in rats in accordance with OECD Guideline 423. Six female Wistar rats received a single oral dose of 200 mg/kg by oral gavage. Animals were observed for two weeks after dosing.

No animals died and no treatment related effects on clinical signs, body weight, or findings at necropsy were seen. The LD50 was >2000 mg/kg.
